

Taking Care of Your Shaved Head

We've put together some of our top tips for keeping your shaved head healthy & happy!

①

Keep it clean

Keeping your scalp clean is an important step to a clean & happy head! Think of your scalp as an extension of your face and cleanse with a hydrating, gentle cleanser.

②

Protect

Your bald head is now even more exposed to the sun's harmful UV rays, so be sure to use a high SPF on your scalp before heading out in the sun. If you're headed on an outdoor adventure, don't forget to bring a hat along!

③

Exfoliate

Keeping the skin on the scalp healthy involves gentle exfoliating - use a gentle, natural scrub product that will help shed off dead skin and keep your head looking healthy and hydrated.

④

Maintain

If you are wanting to keep the scalp shaved, be sure to use a sharp razor along with a shaving gel or cream. Incorporate daily cleansing and moisturising and protect your scalp just like you would your face. A healthy head is a happy head!
